

The 2'x2' can last 12 hours on a car battery. Use the 2'x2' in your hunting blinds and duck hunting boats. Use for your hunting dogs in the back of your trucks. Place underneath your dog houses or underneath the water bowls in chicken coups. Animals love the 2'x2' heated pad.

Strap the 2'x2' heaters to your Hydraulic tanks or anywhere you have frozen pipes coming into your house. Use as a heated foot pad for pump and drill operators. Thaw the ground for fence post holes. Leave in your car overnight to keep the frost off your windows. There are so many uses for the 2'x2'; you can't go wrong having them on hand or giving them as a gift for any occasion.

### ***BARREL, BUCKET AND CUSTOM TOTE HEATERS***

#### 55 MASON STANDARD BARREL WARMER

The PowerBlanket Barrel Blankets are sized for a 55 gallon drum. They come with adjustable bungee straps to ensure proper fit of larger and smaller 55 gallon barrels. The drum heaters come ready to use. Unroll, wrap around your barrel, and plug into any outlet. These Barrel Blanket heaters weigh only 5lbs and wrap around the entire barrel. This produces a fast, even, consistent heat. The built in thermostat will ensure never over heating or under heating your material. Each Barrel Blanket heater has a 6foot male end cord and a 6 foot female end cord. Four of these blankets can be plugged together on one 20 amp outlet. The Barrel Blanket draws 5 amps each. The lower amperage drawing PowerBlanket Drum Heater can be custom made to be plugged into a 12 volt outlet (cigarette lighter). This allows for Barrel Heaters to be used during transportation of materials. Our larger sized SuperDuty PowerBlankets are used on top of large numbers of drums for freeze protection. The PowerBlanket Barrel Warmer is a step above the competition in pricing, durability & functionality. It is now affordable to protect, heat and maintain manufacture material specifications. Try one and see for yourself

The 2'x2' PowerBlanket can be used on top or on bottom of the barrel to bring the material to a desired temperature even faster

55 GALLON MASON BARREL WARMER

The 55 gallon Barrel Warmer for masons and machine shop water evaporators. They come ready to use. Unroll and plug into any outlet. They draw 6.2 amps each; therefore 3 of these can be plugged together when plugged into an outlet supplied with a 20amp breaker. The Mason PowerBlanket Barrel Warmer heats the water to 140° F extremely fast and can be left plugged in all year round causing no damage to the Barrel Blanket or your cord. Cover the top of the barrel with either the 2'x2' PowerBlanket or plywood in order to bring to temperature faster. When using the barrel blankets to evaporate water, covering the top of the drum is not recommended.

5 GALLON BUCKET HEATER

The 5 gallon Bucket Blanket heaters come ready to use. Unroll wrap around bucket and plug into any outlet up to 20 can be plugged together using an outlet supplied with a 20 amp breaker. Each bucket blanket draws less than 1 amp. They have a 6' male end cord and a 6' female end cord. Use them to heat anything and everything that comes in a 5 gallon bucket. They can also be used to wrap around propane tanks.

CUSTOM TOTE HEATER

Tote Heaters are custom made per customer's request. PowerBlanket custom blankets can be made to fit almost any shape, size or temperature requested, for gas trucks and tanks, etc. Custom blankets are made for pre-casters tanks and box covers.
