***Either** 120VAC **or** 240VAC you choose (one or the other, not both)

[†]800W when cold 400W after warming up

¹For constant outdoor use, select waterproof option

Some advantages of the insulated blanket over the "strap" or "band" type;

- Lower energy usage (heats your product not the air)
- More even heat (more surface area for your product to absorb the heat)
- Heats the entire drum so less heat damage to your product
- The ambient conditions have less effect (more effective in cold climates)
